CAREER OBJECTIVE

Ambitious and detail-oriented Artificial Intelligence and Machine Learning student with a strong foundation in neural network architectures, computer vision, and application development. Seeking a challenging AI Developer role to leverage technical skills in building impactful, real-world solutions while contributing effectively to a forward-thinking engineering team.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Machine Learning (AIML) — **Expected June 2027**
Yenepoya Institute of Technology (VTU) — *Moodbidri, KA*
Current CGPA: 7.0 / 10.0

Class 12th (Pre-University College) — **Graduated 2023**
B.G.S PU College — *Balehonnur, KA*
Percentage: 66.0%

Class 10th (SSLC) — **Graduated 2021**
B.G.S High School — *Balehonnur, KA*
Percentage: 58.72%

TECHNICAL SKILLS

Core Engineering Skills:	Neural Network Architecture, Computer Vision, Natural Language Processing (NLP), Data Structures & Algorithms (DSA)
Software & Tools:	TensorFlow, PyTorch, OpenCV, Flutter, Scikit-learn, Keras, Git, GitHub, VS Code
Programming Languages:	Python
Soft Skills:	Analytical Problem-solving, Collaborative Teamwork, Effective Communication

INTERNSHIPS & INDUSTRIAL TRAINING

AIML Virtual Intern — **2026 (6 Months)**
Inlignx Global Private Limited — *Remote*

- Assisted in the development and optimization of predictive models using supervised learning techniques to analyze complex datasets.
- Applied Python, Scikit-learn, and TensorFlow to improve model accuracy by 15% through rigorous data preprocessing and strategic feature engineering.
- Collaborated with cross-functional team members on the end-to-end pipeline of a data-driven project, focusing on identifying key trends and visualizing results for comprehensive stakeholder reports.

ACADEMIC & PERSONAL PROJECTS

Eye Life – Eye Banking Management System **Academic Project**

Developer & Core Architect *YIT*

- Engineered a centralized management system designed to streamline and automate the donor-recipient matching process for eye banks.
- Utilized Python for backend business logic and structured SQL for secure, relational database management, ensuring complete data integrity for sensitive medical records.
- Achieved professional and academic recognition by writing and successfully presenting a research paper on the system's architecture at a National IEEE Conference.

CERTIFICATIONS & WORKSHOPS

- **Professional Certification in AI & Machine Learning** – Inlignx Global Private Limited, 2026
- **Computer Network & Internet Security** – Infosys Springboard, 2026

ACHIEVEMENTS

• **National Level Hackathon Finalist:** Selected as a top competitor in **HACKABHIGNA**, a rigorous 24-hour national-level hackathon held at AIT Chikmagalur.

• **IEEE Conference Presenter:** Successfully published and presented a technical research paper detailing the architecture, engineering workflow, and healthcare impact of the "Eye Life" Eye Banking Management System.
